Reacfin is one of the leading financial and actuarial consulting companies in Belgium and Luxembourg. Thanks to our extensive success, we have also recently expanded our business activities in Germany, France, Central-Eastern Europe as well as Middle East.

Our mission is to support our clients in improving their risk management with up-to-date financial and actuarial techniques. We provide our clients with a large yet always focused and tailor-made scope of expertise in order to meet their specific needs and requirements.

Our team is composed of experienced senior professionals with long-term past management positions in insurance companies combined with bright young talents. We also provide the complex scope of recognized scientific expertise and practical experience on many subjects including Solvency II, economic capital, ALM models, pricing of derivatives, development of a risk management framework, life and non life pricing,…

With a continuous larger number of clients and projects, we are seeking to recruit for the academic year 2011-2012

Two trainees

What do we expect from you?

- Support our consultants in the design, implementation or review of quantitative models
- Help us maintain our technical positioning with R&D tasks

Who are we looking for?

- You have a very strong mathematical background and a keen interest in developing state-of-the-art models for practical applications
- You are proficient in 2 of the 3 following languages: English, Dutch and French
- You have some experience with statistical software such as SAS, R, ReMetrica, Prophet or Matlab, or you are willing to learn
- You have strong communication and technical writing skills
- You enjoy our culture of entrepreneurialism and our knowledge sharing philosophy

What do you get in return?

We offer you diversity in your assignments and continuous support in your professional development. You will get the opportunity to learn our way of working and potentially to obtain a job proposition at the end of your traineeship.
