

IDDI (International Drug Development Institute) is an international data center in the field of clinical research headquartered in Belgium with offices in Boston.

We are looking to fill the following position for our Ottignies Louvain-La-Neuve office:

Biostatistician

Responsibilities:

You will be responsible for statistical aspects of trials:

- => participate to the clinical development plan (trial designs, sample sizes, interim analysis, etc.)
- => Prepare the Statistical Analysis Plan.
- => Write the SAS programs to create the tables and listings
- => Perform the statistical analysis.
- => Report and interpret the results.
- => Write statistical reports and prepare draft publications.

Your Profile:

- => Master's degree in biostatistics, statistics or mathematics.
- => Knowledge of SAS (knowledge of Splus would be an asset).
- => Good knowledge of English language, written and spoken.
- => Willingness to talk with scientists in all areas.
- => Previous experience in clinical research preferable but not required.

Please send your CV to IDDI by e-mail: hr@iddi.com as soon as possible.
