

Saskia le Cessie,

Department of Clinical Epidemiology and Department of Medical Statistics and Bioinformatics,
Leiden University Medical Center, The Netherlands

"Working as statistician in a medical environment, what are the challenges?"

Working as a statistician in a medical school or hospital is one of the possible job opportunities for statisticians. In such a working environment, a large amount of time will be spent doing statistical consultation, teaching statistics to medical students and collaborate as statistician in medical research projects. In this talk I will discuss some of the problems and challenges encountered when working with medical researchers. Topics discussed are: statistical consultation, collaboration in medical research projects, communication with clinicians, time management and the combination of statistical consultation and research.

SMCS Launch Day, April 30, 2010
