

**IDDI (International Drug Development Institute)** is an international company specialized in consulting and biostatistical services in the field of clinical research, headquartered in Belgium with offices in Boston. We are looking to fill the following position for our Ottignies Louvain-La-Neuve office:

### **Biostatistician for Innovative Project**

Responsibilities:

You will be responsible for the statistical design, programming and reporting of an innovative applied statistical research project:

- => Write and maintain SAS programs
- => Process clinical trial data and apply multiple statistical tests in SAS
- => Conduct statistical analyses and perform quality control
- => Report and interpret the results
- => Write statistical reports
- => Prepare publications
- => Liaise with bioinformatics experts and with the project coordinator.

Your Profile:

- => Master or PhD in biostatistics, statistics or mathematics
- => Good knowledge of SAS (knowledge of R would be an asset)
- => Good knowledge of English language, written and spoken
- => Previous experience in clinical research preferable but not required
- => Problem solving skills, team player.

Please send your CV to IDDI by e-mail: [hr@iddi.com](mailto:hr@iddi.com) as soon as possible.
