| Content : | <p>At the end of the course students are expected to have reached a B2+ level of the Common European Framework of Reference for Languages regarding listening and reading comprehension and a B2 level regarding spoken and written skills.</p> <p>This course is mainly interactive and practical. The objective is that the students develop their language skills, and particularly spoken production, by completing tasks. Therefore the used method is Task-Based Learning. In order to enable the student to complete the above mentioned tasks a series of activities, both communicative and centered on the code, are proposed. These activities require the practice of multiple language skills (listening and reading comprehension, spoken and written production, spoken interaction) and most of them have an amusing component.</p> <p>The activities and base materials are very heterogeneous: games, role plays, debates, team/group dynamics, songs, films, documentaries, etc.</p> |
| Bibliography : | <p>Course material: method used during the course and made by the professor according to the described method and from current bibliography.</p> <p>References: large list of resources and materials suitable to this level.</p> |
