Q1

30.0 h

Teacher(s)	Bodart Vincent ;					
Language :	French					
Place of the course	Louvain-la-Neuve					
Main themes	The course is concerned with the study of the main economic factors and mechanisms that explain the determi- nation of external current accounts, real and nominal exchange rate changes and international capital move-ments. The main topics of the course are : the ajustement process of the external current account, the determination of nominal and real exchange rates in the short-run and in the long-run, central bank interventions in the foreign exchange market, the impact of the exchange rate regime on macroeconomic fluctuations, and the mechanics of financial crises.					
Learning outcomes	At the end of this learning unit, the student is able to : At the end of the course, the student is supposed to be able to understand precisely the main concepts, argu-ments, and analyses presented during the class. He must be capable to use the theories presented during the course in order to analyze rigourously international monetary facts and events.					
Evaluation methods	The formal evaluation is an oral exam. The duration of the examen is about 20 minutes. The grade will depend on : (1) how well the student masters the concepts and economic mecanisms taught during the course and (ii) the capacity of the student to apply these concepts and mecanisms to analyse a case study. Depending on the evolution of the epidemic crisis, it may be decided to organize a remote oral examination. If this is the case, the students will be informed on due time about the pratical details of the remote oral exam.					
Teaching methods	A syllabus is available. The syllabus is supplemented by a list of readings that will be discussed during the class.					
Content	Topics The course is concerned with the study of the main economic factors and mechanisms that explain the determination of external current accounts, real and nominal exchange rate changes and international capital movements. The main topics of the course are : the ajustement process of the external current account, the determination of nominal and real exchange rates in the short-run and in the long-run, central bank interventions in the foreign exchange market, the impact of the exchange rate regime on macroeconomic fluctuations, and the mechanics of financial crises.
