Economic Analysis Seminar IV

5.00 credits	30.0 h	Q2
0.00 0.00.00	00.0	~-

Language :	English			
Place of the course	Namur			
Main themes	The teacher proposes an issue to be addressed by the students (for example, is the Walloon Marshall Plan effective?). Students - identify the theoretical elements that address the issue. They identify the logic that guides the economic question; - They identify empirical methods that would answer the question; - They collect data relevant to the empirical analysis; - They perform the empirical analysis; - They interpret the results and explain the problems and the underlying statistical limits.			
Learning outcomes	At the end of this learning unit, the student is able to: At the end of the activity, students will be able - to synthesize the elements that are essential to the understanding of a generic economic problem, - to collect, select and analyze relevant data and information using rigorous and state-of-the-art methods - to express a message in a clear, concise and structured way, both orally and in writing, - to manage their work: set priorities, anticipate and plan all the relevant steps, - to work in team.
