CRIM2M - Introduction

CRIM2M - Admission

For the specific conditions of this program : refer to the French version

General and specific admission requirements for this program must be satisfied at the time of enrolling at the university..

CRIM2M - Information

Learning outcomes

The goal of the master is to offer the students the theoretical and methodological resources to understand criminality and penalty and, more generally, deviance and social control.

The professional focus master aims to help students specialise in intervention in order to be able to teach in sectors aiding and protecting young people, the police, executing penalties and criminal measures, legal aid and dealing with delinquency.

The research focus master aims to train students in careers in research and analysis in the fields of psychological or sociological criminology and criminal policy.

Skills developed :

- Deeper understanding and critical analysis of criminality and penalty, deviance and social control, and the scientific work devoted to these phenomena;
- Conducting interviews ; intervening in situations of conflict and crisis, reflecting on intervention practices
- Wording of research questions; building up research tools; carrying out empirical research; thinking about research practices.

Knowledge to acquire :

- Major theories in psychological and sociological criminology from the crime to the administration of criminal justice;
- Intervention and research methodology ;
- Legal matters in relation to criminality and penalty.

Teaching method

FIRST YEAR OF THE MASTER

Cross-disciplinary training in sociology, psychology and law

SECOND YEAR OF THE MASTER

Professional focus: the professional focus prolongs the core courses through cross-disciplinary training made up of criminological integration courses.

The student's understanding of criminality, penalty will be put to the test through a 300h internship, which will also help him develop analytical and intervention skills.

Research focus: the research focus prolongs the core courses by going into more depth on major theoretical views, not by giving the student encyclopaedic knowledge but rather with a view to highlighting the link between epistemological, theoretical and methodological options.

Evaluation

Each course on the programme includes an oral or written exam, possibly completed by a project leading to a report which forms part of the evaluation. The internship and the work on the dissertation involve the drafting of a document which will be presented orally to a jury.

Mobility and/or Internationalisation outlook

During the second semester of the second year of the Master, students can participate in an Erasmus exchange with other university institutions in Flanders (KUL), Spain (Valencia), France (Rennes) and Italy (Pisa). Thanks to bilateral agreements, the student can also take courses at the Universities of Montréal and Ottawa (Mercator exchanges).

The research focus will guarantee the school's position on the international academic stage: courses taught correspond to its strong points, underlined by the carrying out of doctorates.

Possible trainings at the end of the programme

Accessible advanced masters : not applicable

Accessible doctoral training : doctoral training in criminology

CRIM2M - Detailed programme

Programme structure

Programme content

The programme of the Master en criminologie is built around core courses mainly taught in the first year, on the basis of which students are invited to take the research or professional focus in the second year, as described above, for a total of 120 credits.

The core courses amount to 90 credits, spread over two academic years as follows: the end of study dissertation and its accompanying seminar for 17 credits and a languages module for 8 credits spread over the two academic years, whilst the four 'disciplinary' modules of 12 to 14 credits ('méthodologique', 'juridique', 'sociologique' and 'psychologique') are taught in the first year and the professional internship and its accompanying seminar for 15 credits are in the programme for the second year.

Each of the two focuses – research, professional – number 30 credits, which are added to these core courses, spread over 5 courses of 6 credits which are also taught in the second year of the master.

Whatever the focus or the options chosen, the programme of this master shall totalize 120 credits, spread over two years of studies each of 60 credits.
