INTR2MC - Introduction

Introduction

INTR2MC - Teaching profile

Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Internal Medicine, (Ministerial Decree of 19.03.1979, published on 15.03.1979).

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, full-time, including at least three years of foundation studies and two years of higher studies in Internal Medicine. The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

INTR2MC Detailed programme

Programme by subject

Parallel to the practical training, the specialist candidate will follow a university training programme organised as follows :

part - Foundation studies

Three years, full time, consisting of :

- Theory
- Seminars
- Supervised practical exercises

Sessions organised by the different department services, the Belgian Society of Internal Medicine or associated specialities and inter-university conferences.

The theoretical sessions of the first two years form part of the specific university training programme (FUS, in French).

part - Higher studies

Two years, full time, consisting of :

- theory : specialised courses in General Internal Medicine, Evaluation of the quality and organisation of treatment
- Seminars
- A supervised apprenticeship period in a hospital

The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

INTR2MC - Information

Admission

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

Admission conditions

First part

- The applicant must hold the degree title of Doctor in Medecine or be a Doctor from a member country of the European Union authorising medical practice in Belgium.
- Further to the royal decree of 16th March, 1999, the applicant must be in possession of a document attesting that, at the end of the selection exams, he was retained as a specialist candidate in Internal Medecine, in a Belgian medical faculty. The juridical context and practical procedures for this selection exam can be obtained from the secretary's office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of the 30.05.2002, relating to the planning of the medical offer for the public, published on the 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Internal medecine (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Second part

- the candidate must have satisfied the requirements of the first part of the degree course of specialised studies in Internal Medecine.

Admission procedures

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

First part

Semestrial clinical evaluations : these evaluations are established (in writing) by the training supervisor of each candidate and focus on different items. The evaluations of all the candidates are reviewed during the two semestrial meetings of the ensemble of the training supervisors. Further to the application of the Royal Decree of 16 March, 1999, at the end of the first two years of the training programme, the candidate will apply for an attestation proving that he has successfully accomplished a specific university training course.

Second part

Semestrial clinical evaluations : these evaluations are established (in writing) by the training supervisor of each candidate and focus on different items. The evaluations of all the candidates are reviewed during the two semestrial meetings of the ensemble of the training supervisors.

At the end of these two years of studies, each candidate will be evaluated during the course of an interview aimed at testing his in-depth knowledge of General Internal Medicine. The writing of a thesis (20-25 pages) on a sujet relating to General Internal Medicine. The instructions for the thesis are available at the secretary's office for Internal Medicine. The publication of an article on a clinical or scientific internal medicine subject or the presentation of a paper to a scientific meeting. Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Internal Medicine. This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
