MEGE2MC - Introduction

Introduction

MEGE2MC - Teaching profile

Learning outcomes

The complementary master's programme of General Medicine aims to further basic knowledge acquired during the PhD programmes for the management and accompaniment of health problems encountered on the first level of health care, and by means of supervised apprenticeship periods, study summaries, seminars and supervised pieces of work. It prepares the candidate to obtain the professional title of General Practitioner.

Programme structure

The total length of the specific training programme in General Medicine cannot be for less than 3 years (Ministerial Decree of 1/10/2002, European Directive 2001/19/CE). The length of the training programme is at least two years after having acquired the degree of Doctor in Medicine. The first year of the DES may be validated by following the 4th study year of the PhD programme in Medicine, with the "General Medicine" orientation.

Besides theoretical and practical sessions, it includes full-time training periods carried out with general practitioners or in hospital services, approved by the Ministry for Public Health and recognised by the Faculty of Medicine. The student degree holders who have successfully followed the "General Medicine Orientation" in the 4th year of studies of their PhD in medicine, obtain the credit of 6 months apprenticeship in an approved hospital service and 6 months work experience with a recognised General Practitioner or in a recognised centre for primary care.

The graduate students who have not followed the "General Medicine" orientation in the 4th year of PhD studies in medicine must follow the programme described below during the course of the DES. The length of the work experience in a hospital is a minimum of 6 months and a maximum of one year for the ensemble of the training. Apprenticeships in developing countries are authorised and counted as a quarter of their length. These training periods may only concern one year of the complementary training (Ministerial Decree of 06/04/1999). Apprenticeships in a country of the European Community are authorised for the maximal duration of one year (Ministerial decree of 06/04/1999).

Year

1 2

⊗ Programme court (120 credits)

Ce programme s'adresse aux étudiants qui ont suivi avec fruit la totalité de la formation théorique et pratique prévue dans la finalité spécialisée et l'option "médecine générale" de la 4e année d'études du master en médecine. Ce programme comprend 2 années de stages à temps plein (stage hospitalier ou stage chez le généraliste).

○ Premier bloc annuel (60 credits)

○ Modules de formation (10 credits)

						Year	
						1	2
○ WMEGE3001	Travail de fin d'études (1ère partie)	N.		9 Credits		x	
○ WMEGE3030A	Séminaires de pratique accompagnée (1ère partie)	N.		3 Credits	1 + 2q	x	

○ Stages (45 credits)

L'étudiant choisit entre les deux lieux de stage (hospitalier ou cabinet de médecine générale). Le stage hospitalier ne peut dépasser une année (maximum 3 à 6 mois selon la spécialité dans le même service) (A.M. 08/07/1999, art. 7). L'étudiant qui choisit le stage hospitalier en première année ne peut donc plus le choisir en deuxième année.

⌘ WMEGE9302	Stages de médecine générale chez le généraliste	N.		48 Credits		x	x
⌘ WMEGE9301	Stages hospitaliers de médecine générale	N.		48 Credits		x	x

○ Deuxième bloc annuel (60 credits)**○ Activités obligatoires**

○ WMEGE3030B	Séminaires de pratique accompagnée (2ème partie)	N.		3 Credits	1 + 2q		x
○ WMEGE3002	Travail de fin d'études (2ème partie)	N.		9 Credits			x

○ Stages

L'étudiant choisit entre ces deux lieux de stage (hospitalier ou cabinet de médecine générale)

⌘ WMEGE9303	Stages de médecine générale chez le généraliste	N.		48 Credits		x	x
⌘ WMEGE9301	Stages hospitaliers de médecine générale	N.		48 Credits		x	x

⌘ Programme long (120 credits)

Ce programme s'adresse aux étudiants qui commencent leur formation en médecine générale après la 4e année du master en médecine. Ce programme s'organise comme suit : A) 1 année de cours + des stages en pratique de médecine générale ou en pratique hospitalière B) 1 année d'études réalisée automatiquement pendant 2 années de stages à temps plein (en pratique de médecine générale ou en pratique hospitalière).

○ Premier bloc annuel (60 credits)**○ Cours obligatoires (10 credits)**

○ WMEGE2401	Séminaire de médecine générale et exercices de prescriptions médicales	Guy Beuken, Michel De Jonghe, Emilie Dumontier, Jean-Marc Feron (coord.), Dominique Lamy, Bruno Verstraete	22h+14h	2 Credits	2q	x	
○ WMEGE2402	Recherche, littérature médicale et questions spéciales de pratique et de stage	Michel De Jonghe (coord.), Emilie Dumontier, Jean-Marc Feron, Sophie Leconte, Bruno Verstraete	36h	2 Credits	2q	x	
○ WMEGE2403	Logistique, techniques et aptitudes en médecine générale	Guy Beuken, Emilie Dumontier, Corentin Duyver (coord.), Jean-Marc Feron, Philippe Heureux, Sophie Leconte, Didier Thillaye du Boullay, Charles Vanwelde, Bruno Verstraete	32h	2 Credits	2q	x	
○ WMEGE2404	Parcours de formation et sensibilisation à la relation médecin-malade en médecine générale	Cécile Bolly, Dominique Charlier, Emmanuel de Becker, Philippe Heureux (coord.), Denis Jacques, Christine Reynaert	36h	2 Credits	2q	x	

						Year	
						1	2

○ WMEGE3002	Travail de fin d'études (2ème partie)	N.		9 Credits		x	x

The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

MEGE2MC - Information

Admission

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

Admission conditions

Before being authorised to embark on the specialised training programme in General Medicine, (MEGE 2MC), the doctor in medicine must prove that he has followed, in a continuous way, 200 hours of recognised lectures (Ministerial Decree of 03/05/1999) organised by a university centre for General Medicine (CUMG).

Furthermore :

- The applicant must hold the degree title of Doctor in Medicine or be a Doctor from a member country of the European Union authorising medical practice in Belgium.
- The applicant must be in possession of a document attesting that, at the end of the selection exams, he was retained as a specialist candidate in General Medicine, in a Belgian medical faculty.

The juridical context and practical procedures regarding these selection tests can be obtained from the secretary's office. Degree holders or graduates from outside the European Union may only enrol on this programme with the aim of obtaining a university certificate for partial specialised training of one year's duration.

The Royal Decree of the 30.05.2002, relating to the planning of the medical offer published on the 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in General Medicine (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Admission procedures

Information can be obtained from the secretary's office for the complementary masters' programmes CUMG (Brigitte Zuyderhoff). Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

First year

- Exams for those students beginning their studies in General Medicine and
- Evaluation by the work training supervisor leading the practical support seminars for all candidates

Second year (and third year)

- Evaluation by the work training supervisor leading the practical support seminars
- Evaluation of certification carried out by the jury of the programme involving the defence of a personal piece of work before an inter-university jury. (MEGE3001 End of course project).

Further to the application of the Royal Decree of 16 March, 1999, the candidate will receive, at the end of the first two years of training, an attestation proving that he has successfully accomplished a specific university training course. The necessary attestation for obtaining the title of recognised General Practitioner, can only be awarded at the end of the years of the Complementary Masters.

Possible trainings at the end of the programme

Doctors enrolled on the Complementary Master's programme of General Medicine will be awarded, at the end of their studies, not only the Diploma for Specialist Studies in General Medicine, but also the title of Recognised General Practitioner, from the Ministry of Public Health. This title entitles access to a specific nomenclature (higher level of reimbursement of fees) and is necessary in order to obtain the right to practise general medicine within the countries of the European Union.
