ONCO2MC - Introduction

Introduction

ONCO2MC - Teaching profile

Learning outcomes

This programme in the Advanced 2nd cycle is designed to prepare doctors to qualify for the professional status of specialist doctor in medical oncology (Ministerial Decree of 29 May 2006, published on 14 June 2006).

Programme structure

Full time training takes six years, including at least three years of basic training in internal medicine and three years of advanced training in medical oncology.

It also includes theoretical training. Advanced training is made up of three years of placement in one or more of the departments approved for training in medical oncology.

The plan for the placement drawn up by the university placement coordinator must be approved by the ministerial qualification committee for the relevant specialization. These placements include duty activities.

ONCO2MC Detailed programme

Programme by subject

In parallel with the practical training, candidates take a course organized as follows :

Basic training

Three years, full-time, comprising :

- theoretical teaching
- seminars
- supervised clinical training

The theoretical teaching in the first two years forms part of the special university training.

Advanced training

To familiarize candidates with all the aspects and methods of diagnosis and the correct administration of systemic cancer treatments and the management of the risks involved, three years, full-time, comprising :

- theoretical teaching :
- advanced issues in Cancerology (INTR3870)
- Belgian inter-university course in medical oncology
 - seminars
 - active involvement in multidisciplinary coordination meetings including surgeons, radiotherapists, anatomopathologists, gastroenterologists, pulmonologists, radiologists, specialists in nuclear medicine, general doctors, psychologists and dieticians.
 - supervised clinical training
 - training in the design and scientific assessment of clinical trials
 - training in the management of medical data, recording cancers and the use of data from the cancer register

The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

ONCO2MC - Information

Admission

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

- Candidates must have a degree as a Doctor in medicine, or a Master in medicine or as a doctor from a member state of the European Union which enables them to practise in Belgium.
- They must also have a document showing that after the selection examination, they have gained a place to specialize in medical oncology in a Belgian medical faculty.

Further details of the legal requirements and the practical procedures involved in the selection examination may be obtained from the administrative office.

Holders of a degree from outside the European Union may not enrol for this programme except in the context of a university certificate in partial specialized training lasting two years (if they are studying a specialization in their home country) or advanced specialized training for a year (if they have already gained the status of specialist in their country).

The Royal Decree of 30 May 2002 on the availability of medical studies, published on 14 June 2002, applies to candidates who wish to gain professional status as specialist doctors in medical oncology. (These candidates therefore fall into the category of generalists or specialists in the restricted intake.)

Applications should be submitted to the lecturer in charge of the programme.

The organization of the selection examination is in accordance with the timetable and the general examination regulations.

Selection committee

The selection committee (MACCS) is made up of members of the programme committee together with two invited members and two coopted members.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

6 monthly clinical assessments: these are organized (in writing) by each candidate's placement supervisor and focus on different areas. Assessments for all the candidates are examined by all the placement supervisors at six-monthly meetings.

First part

At the end of the three-year basic training, each candidate is assessed at an interview designed to test their general knowledge of internal medicine. In accordance with the Royal Decree of 16 March 1999, candidates will receive an official certificate to show they have successfully completed a special university training course.

Second part

At the end of the three years of advanced training, each candidate is assessed on their in-depth knowledge of oncology. Candidates must also take the inter-university examination organized by the inter-university post-graduate training panel. They must produce a dissertation on a topic in medical oncology and publish an article.

When the above requirements have been fulfilled, the programme committee will award the academic degree of Advanced Master in Medical Oncology.
