Introduction

Teaching profile

Learning outcomes

The approfondissement in economics completes the baccalaureate program in economics and management. It allows the student to gain a deeper understanding of the subject in workshop-seminars (15 credits) as well as taking courses in economics (15 credits) which are not given as part of his/her baccalaureate program.

On successful completion of this programme, each student is able to :

1. Maîtriser des connaissances et compétences approfondies dans certains domaines des sciences économiques afin de faciliter le choix de la finalité et des options de son master.
2. Développer une compréhension approfondie de questions complexes en économie relatives à des thématiques complémentaires à celles étudiées dans le cadre de la majeure.
3. Démontrer une compréhension approfondie et exploiter avec pertinence une palette élargie d'outils d'analyse critique relevant des sciences économiques.

COURSE PREREQUISITES

A document entitled [en-prerequis-2016-app-lecon100p.pdf](#) specifies the activities (course units - CU) with one or more pre-requisite(s) within the study programme, that is the CU whose learning outcomes must have been certified and for which the credits must have been granted by the jury before the student is authorised to sign up for that activity.

These activities are identified in the study programme: their title is followed by a yellow square.

As the prerequisites are a requirement of enrolment, there are none within a year of a course.

The prerequisites are defined for the CUs for different years and therefore influence the order in which the student can enrol in the programme's CUs.

In addition, when the panel validates a student's individual programme at the beginning of the year, it ensures the consistency of the individual programme:

- It can change a prerequisite into a corequisite within a single year (to allow studies to be continued with an adequate annual load);
- It can require the student to combine enrolment in two separate CUs it considers necessary for educational purposes.

For more information, please consult [regulation of studies and exams](#).

THE PROGRAMME'S COURSES AND LEARNING OUTCOMES

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.
