Introduction

Introduction

Teaching profile

Learning outcomes

The main objective of the minor is to train students enrolled in a bachelor programme to acquire a basic training in population and development studies, enabling them to understand and, to some extent, analyze the challenges of poverty, demographic transitions, ageing populations, North-South inequalities, and the interactions between population, environment and development.

The minor combines into a single block six courses (of 5 credits each) organized by the Department of population and development studies. . These six courses provide an overview of the population-development issues and train students to acquire knowledge in:

- demographic analysis and development theories
- population and development policies
- issues and challenges of the 21st century, both demographic as well as political, social and economic
- relationships between gender and social, economic and political inequalities
- analyses of the interaction between population, environment and development.

On successful completion of this programme, each student is able to :

1. Acquérir et démontrer une compréhension d'un socle de connaissances en sciences de la population et du développement
2. Démontrer une connaissance et une compréhension des outils de base des sciences de la population et du développement
3. Découvrir et saisir la rigueur exigée et faire preuve de cette intégration.
4. Faire preuve d'une capacité de questionnement à partir du raisonnement spécifique aux sciences de la population et du développement
5. Percevoir les spécificités des sciences de la population et du développement et construire une réflexion complémentaire à celle de la discipline de sa majeure afin d'enrichir l'étude d'une problématique.

COURSE PREREQUISITES

A document entitled [en-prerequis-2016-min-Isped100i.pdf](#) specifies the activities (course units - CU) with one or more pre-requisite(s) within the study programme, that is the CU whose learning outcomes must have been certified and for which the credits must have been granted by the jury before the student is authorised to sign up for that activity.

These activities are identified in the study programme: their title is followed by a yellow square.

As the prerequisites are a requirement of enrolment, there are none within a year of a course.

The prerequisites are defined for the CUs for different years and therefore influence the order in which the student can enrol in the programme's CUs.

In addition, when the panel validates a student's individual programme at the beginning of the year, it ensures the consistency of the individual programme:

- It can change a prerequisite into a corequisite within a single year (to allow studies to be continued with an adequate annual load);
- It can require the student to combine enrolment in two separate CUs it considers necessary for educational purposes.

For more information, please consult [regulation of studies and exams](#).

THE PROGRAMME'S COURSES AND LEARNING OUTCOMES

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

Admission

Since it does not require any prerequisite subjects or special training, the minor is open to any student enrolled in a bachelor programme at UCL. Since it employs tools and approaches which mainly come from social and human sciences, it provides further training both for students in science and technology or health sciences as well as for those who wish to widen their programme in human sciences.

Possible trainings at the end of the programme

This minor may be chosen by students studying a particular subject as a means of broadening their horizons and training in an interdisciplinary issue. It may also be used as a preliminary stage towards the 120 credit Master in Population and Development Studies.
